

ASQ Screening at Home

WHAT IT IS - You will be asked to have your child perform a wide variety of tasks and rate their ability to do them. Some of these skills your child may not be able to do yet, and others may be very easy for your child.

TIME – You will need approximately 20 minutes to complete the screener with your child. If at any time you need to stop, you can always print a copy of the ASQ screener and complete it at a time convenient for you; then mail your completed form to Lenawee Great Start.

MATERIALS - If you don't have all the items suggested for doing this assessment at home, here are some ideas for what you can use instead:

1. Lacing beads and string = fruit loops and shoelaces
2. Crayons = any writing tool
3. Rattle = popcorn or rice in an empty bottle and sealed tightly.
4. Mirror = handheld mirror at home or mirror on wall
5. Lacing = most homes have shoes with laces on them to practice
6. Velcro = most homes have Velcro on shoes
7. Buckles = most backpacks have buckles
8. Blocks = empty Kleenex boxes at home for stacking
9. Balls = balls can be purchased at most dollar stores or parents can use socks rolled into each other to make a "homemade" ball
10. Zippers & Buttons = most homes have an article of clothing with a zipper and buttons
